Project No. 0503422

Subject: Documentation of Face-to-Face Meeting – December 2018
Calaveras Power Station
San Antonio, Texas

Dear Mr. Malone:

CPS Energy owns and operates the Calaveras Power Station which consists of two power plants that are subject to regulation under Title 40, Code of Federal Regulations, Part 257 (40 CFR §257) (a.k.a. the CCR Rule). Per 40 CFR §257.73 (a)(3)(i)(E), an annual face-to-face meeting or exercise must be held between representatives of CPS Energy and local emergency responders.

The annual face-to-face meeting or exercise must be held regardless of whether one of the emergency levels has occurred. If an incident defined by one of these emergency levels occurs, then the annual meeting date may be moved to discuss the incident.

This letter documents the annual face-to-face meeting conducted on December 11, 2018. This meeting was attended by representatives of CPS Energy and SWS Environmental Services. This letter must be maintained in the facility's operating record and must be uploaded to the established CCR website.

ERM appreciates the opportunity to work with you on this project. Should you have any questions, please contact us.

Sincerely,

Environmental Resources Management
