

February 2, 2026

Dear Landowner,

We want to thank you for allowing us to serve your energy needs. CPS Energy would like to inform you of an upcoming project involving the South San to Leon Creek 138kV transmission lines that are crossing your property. Our contractor, Southeast Power, will be rebuilding approximately 1.6 miles of high voltage transmission lines.

Southeast Power will be replacing transmission poles and high-voltage wire. The first phase of this improvement project is expected to begin on February 16, 2026, and is anticipated to be completed by May 29, 2026. Work will be completed along and south of Pitluk Avenue.

The anticipated working hours during the scheduled work week will be from 7 A.M. – 7 P.M. and occasionally on weekends. No electric outages are expected due to this work.

Please be advised that there will be vehicular traffic through the easement as crews transport equipment and materials in and out of the construction site.

If you have any questions or require more detailed information about this important project, please contact me at (210) 353-3595 or by email hamy@cpsenergy.com. Thank you in advance for your patience and understanding as we work to complete this significant project.

Sincerely,

Henry Amy
Project Manager
